Near Accident For C.P.R. Passenger Train East of Bow Island

It is reported that someone laid some Ties across the railway track last Monday night, near Invermay siding about five miles East of Bow Island, but fortunately a farmer noticing the danger, removed the ties before the arrival of the Passenger train, No. 98, which is due at Bow at 1:15 a.m.

That farmer is worthy of great praise for averting what might have been a serious accident with loss of life. Mr. and Mrs. E. O. Thompson spent Monday shopping in Medicine Hat.

Mr. E. O. Thompson and his family were on the train when it was derailed. Mr. E. O. Thompson was not injured.

NOTICE

A meeting of the Liberals of Bow Island, will be held on Saturday evening at the hour of 8 o'clock, in the office of F. O. McKenna for reorganization purposes.

Mr. Wolfe and wife left on Tuesday for Portland, Oregon.

Mr. M. Goldreich returned home to the farm on Saturday.

The Missionary Society held a meeting on Wednesday evening at which a Junior Branch was formed by the organization Mrs. F. O. McKenna.

A program was put on and a very nice lunch served to all.

Mr. West Potter and Mrs. E. O. Thompson spent Monday shopping in Medicine Hat.

Mr. E. O. Thompson and his family were on the train when it was derailed. Mr. E. O. Thompson was not injured.

Bow Island News Armistice Eve Concert Huge Success

Veterans have their new G.W.V.A. Hall packed to overflowing, for their Concert
Hall was decorated with Union Jacks and Lovely Poppies and Sprays

It must have been very gratifying to the G.W.V.A. and the Ladies Auxiliary also for all those who took part in the Concert last Friday evening. To see such a crowded Hall, and hear the hearty applause given to each number, as it was put on and the enthusiastic calls for encores, the following is the Program which was given by all Local Talent.

Mr. T. E. Blaine was chairman for the evening and opened the concert with a few very appropriate words, suitable for the occasion.
Of Canada..... Sung by Everybody
Marching Song..... Selected..... Mrs. J. A. Bell
Song..... That dear Home of mine..... Mrs. J. A. Bell
Reading..... Katie Smart learning to enquire..... Mrs. M. Bowen
Encores..... In Plunder's Fields
Song..... All for the Love of Mike..... Miss Greta Ostrum
Encores..... The Goodbye Kiss
Reading..... Selected..... Mrs. A. Gage
Encores..... The Old Fashioned Place..... Mrs. Lillian Anderson
Dance..... The Highland Fling..... Misses Fern Allen
Encores..... Dance repeated..... Misses Ada Hagen
Duet..... Larkboard Watch..... Mr. and Mrs. Pippard
Reading..... The Way of the West..... Mrs. W. S. Henry
(Nellie McLaughlin)

Quartette..... Soldiers' Chorus..... Messrs. H. Bell, J. Halton
Encores..... The Massillia..... Messrs. H. Bell, J. Halton
Speech..... Mr. Daney
Song..... Tommy Atkins..... Mrs. Pippard
Bagpipe Selection..... Selected..... Mr. Geo. Calder
Encores..... Selected
Song..... He calls me his own Grace Darling..... Mrs. Arbuthnot
Encores..... He was very good to me
Dance..... Selected..... Mr. Little
God Save the King

The following accompanied on the piano: Mrs. Roach, Mrs. Hocking, Miss Rose Herie and Mr. and Mrs. Hunt. Mr. Hagen accompanying with the violin. Each number was exceedingly well rendered and heartily applauded and encores.

Bow Island and Districts are hoping for another good concert like this one again in the very near future.

It is estimated that about 200 people were at the Concert and about 100 attended the Dance in the old hall, the good music which was provided made the big crowd dance merrily, till the small hours of the morning, only being interrupted by the Ladies of the Auxiliary serving a very nice lunch at midnight which everyone enjoyed, and the whole evening proved a real success both the Concert and Dance.

Mrs. A. E. Anderson and Mrs. Henderson were selling Poppies on Friday last, in very delicate and picturesque baskets, and everywhere on Friday and Saturday the lovely Poppies were to be seen.
Saturday, Armistice Day, was observed by the three minutes silence. Mr. Hunt sounding the First Signal at three minutes to 11 o'clock, during the silence Mr. Geo. Calder played the selection on his bagpipes called, "The Flowers of the Forest" it sounded very sweet and served to carry one's thoughts to the "dear dead" lying in Flanders' Fields.
Donald Blaine returned to Calgary on Monday morning to attend school, there after spending the week end with his parents here.

Mr. Prillman formerly of Bow Island now living at Eagle Point Oregon, spent a few days visiting at Bow Island with old friends last week, leaving on the evening train on Monday for North Dakota to look after his farm interests there.

Mrs. E. Wilmot entertained a few friends to a social on Tuesday evening and all report an excellent time.

New Method to Produce Good Crops in Districts Where Moisture is Scarce

Mr. R. K. Bohannon, near Oyen, Alta., whose farm is on Sec. 23, T. 20, R. 2, W. 4th, uses a new method of his own, which he claims is always successful in raising crops in the Dry Belt.

The particular land in question is the farm of 80 acres on which he lives. Of this there are 400 acres not apt for cultivation and 80 acres in permanent pasture, of the 400 acres only two hundred are used each year, the other two hundred being left for preparation for the following year's crop.

The character of the soil is very similar to most of the lands in Southern Alberta, and in this is no more adapted to such crops as are grown than the ordinary lands, which all the more makes this a type sample of what may be done elsewhere. In the operation of this land he uses only eight horses, and these are all operated by one man.

How it is done

His procedure is about as follows: After the seeding is done in the spring, he starts his work of Summer-fallow, using an ordinary duck-foot cultivator, cutting nine feet wide, with thirteen 12-inch blades, and in his first plow he cuts them to cut about four inches deep. The use of the wide blades is important, as this fully covers every inch of the soil and does not allow any of the weed roots or other roots to remain in their position to the detriment of the second operation. This operation is handled with six horses. These blades are kept well sharpened, as dull ones "bluff" the roots rather than cut them, and hinder the work.

As soon as this operation is completed, he again starts the work of cultivation, but this time in an opposite direction. He also removes the two outside blades, and adds two more horses, three being abreast can be handled to better advantage than can be handled by two, the close draft makes for more effective work. In this operation he allows the blades to cut at least one and a half inches below the first operation. When this is done, he again removes two more blades, and sets his levers so as to go another one and a half inches deeper, and follows this up until all is completed.

Land Pulverized

This means that in all he has the land fully pulverized to a depth of at least seven inches, and if possible eight is better, and it is ready to lay by till the following spring, when he operates his Arise harrow and level to the ridges ready for the drill.
So far as removing blades, or adding more horses is entirely up to the farmer but he has found this method very satisfactory.

Mr. Bohannon has found that three operations have been sufficient except in certain small areas where it may be the soil is different from the balance, and this may need several operations to put it in the best of condition, but his advice is to do this even if it takes

half a dozen operations.
The question of the amount of seed to the acre is a matter of some moment, his advice being about one bushel of well-cleaned wheat, of the best germination quality.

One of the great advantages of summer-fallow prepared in this way is the entire elimination of the weeds which during these several dry seasons have become such a menace that in many cases they entirely crowd out the crop, leaving nothing of the original seedling to grow, and so utterly defeat the handling of the land.

Mr. Bohannon shows conclusively that if the weed seeds are turned under, and the soil is in a good condition, and the surface is at all dry at the time, they may lie there even for a year or more, only to come to the front when they are again turned up, and become the same menace if not worse, than if they had been on the surface.

Right here seems to be one of the very best points in favor of the process followed by Mr. Bohannon.

One thing that impresses me in this system of operation is the fact that it will not cost any more than the ordinary way of handling land for summer-fallow, and when such outstanding results may be shown, I see every reason for adopting this in any section where there are not too many stones, which in any case will prevent proper cultivation in this way.

Maleb News

The U.F.A. and U.F.W.A. held a joint meeting at the home of Mr. and Mrs. F. W. Twiss last Thursday the 9th, a very good crowd was present and spent an enjoyable time, a nice lunch was served after the business, the next meeting will be held at the home of Mr. and Mrs. S. Bull, December 17th. During the winter months the U.F.A. and U.F.W.A. will hold their meetings together.

Mr. and Mrs. Pippard, Mr. and Mrs. Twiss and Mrs. Bowen spent Saturday evening at Bow Island.

Mr. and Mrs. Shaver have every one's sympathy in having their house burned in which they were going to live this winter, only some bedding was saved the furniture being all burnt.

Bow Island

At the home of Mr. and Mrs. Hust last Wednesday evening, several ladies were entertained by Mrs. Hust and Mrs. Roach.

To Probe Claim That North Dakota Town Is Rendezvous Of Bandits

Minot, N.D.—Characterizing news dispatches from Winnipeg to the effect that an international gang of crooks is headquartered in Minot and preying upon Canadian banks, as a "savage writer's dream," Chief of Police Larry M. Byrne emphatically denied that such a condition exists.

He also declared that North Dakota sheriffs who have been asked by the Canadian authorities for cooperation, have given it willingly. "While a gang of robbers may have passed through this city, no such gang has a rendezvous here," the chief said.

"It appears to be," he said, "that the Canadians are trying to shift the blame to Minot authorities in order to cover up some of the inefficiencies existing in the police quarters in the Dominion."

PASCO, N.D.—M. A. Hildebrand, United States District Attorney for North Dakota, has asked for a federal grand jury to investigate a "leak and cry" that Minot, N.D., is a rendezvous for bandits.

Mr. Hildebrand has just returned from that city where the Federal Court has been in session for several weeks and added that he had no definite knowledge of the situation there when told of reported complaints on the situation by the Canadian authorities.

Winnipeg—Commenting on the dis-

patch from Fargo, N.D., stating that M. A. Hildebrand, United States District Attorney for North Dakota, had asked for a federal grand jury to investigate statements that Minot, N.D., is a rendezvous for bandits, Attorney-General Craig stated that he was glad to know that some action was being taken, though he did not think that the procedure indicated was the best to be taken.

"I doubt very much if much would be gained by a public investigation, and I think a secret investigation would be more effective," he stated.

Attorney-General Craig said that the authorities whom it was thought would be able to assist with a view to getting Minot cleared of criminals, in the case of the United States department at Washington, it rested with the Department of Justice at Ottawa to make the investigation, and this department has been asked to do so.

Mr. Craig would make no comment on every reason he believes, were the Chief of Police Byrne as denying that an international gang of crooks was headquartered in the city and was preying upon Canadian banks.

Will Organize Fire Investigation Bureau

Through Inquiry Is Object of Eastern Canadian Insurance Companies

Mineral—Incidental to the responsibility for such a large and growing percentage of fire losses in Eastern Canada that insurance companies are joining together in the organization of a bureau to investigate all fires of suspicious origin and, where justified, to prosecute suspects. Officially, it was announced at the Canadian Underwriters' Association. Local heads of insurance companies declare that they show that hundreds of thousands of dollars are being paid out annually on account of fires which, they believe, were due to carelessness. There is actually evidence in hand. It is said, to show the existence of a well organized fire bureau in Montreal and Toronto, and furthering the evidence that a rate of from \$200 to \$300 is charged for "arranging a fire."

Protest Changing Date Of Armistice Day

Veterans Want Celebration Held On Original Date

Ottawa—A protest against the changing of the date of Armistice Day in Canada was voiced in a resolution passed at a meeting of the Dominion Veterans' Alliance. The resolution urges "that the Government take immediate steps to rectify this change with the expression that such change of date is unpopular throughout Canada and certainly will never be recognized by the men who assisted in bringing about the armistice of the day of November 11, 1918." The resolution is being forwarded to the Government.

An act was passed last year, it will be remembered, bringing the Armistice Day and Thanksgiving Day holiday together on the first Monday in November. This year the holiday falls on Nov. 6, but war veterans throughout the Dominion are in most cases holding their armistice celebration on the original date, which is the following Saturday, November 11.

Prince Postpones Visit To South Africa

Finds It Impossible to Take Trip This Year

London—Although the Prince of Wales is anxious to visit South Africa at as early a date as possible, he regrets that it will be impossible during 1933, according to a statement issued by Prince Arthur of Connaught, Governor-General of the Union.

So anxious are the people of South Africa to have a visit from the Prince that reports have been in circulation in the Dominion that His Royal Highness would visit them almost immediately.

Admiral Beatty in Motor Accident

London—Admiral Lord Beatty was in a painful condition following a motor car accident recently when it was considered that his injuries were very slight. The Admiral was returning from a hunt near Dorking, when, in an attempt to avoid a bicycle, his car ran into a ditch. He was severely shaken, though, it is understood, no bones were broken. He is still confined to his bed.

THE KING DISSOLVES PARLIAMENT

MANIFESTO OF PREMIER LAW CONTAINS NO REMARKABLE SURPRISES

London.—The King at Sandringham issued a proclamation dissolving Parliament, which had lived four of its constitutional five years, and announcing the new Parliament to meet on November 20. The country is now without a Parliament, but has plenty of candidates for the next one.

The only notable event was the issuance of Premier Bonar Law's manifesto. This contained no remarkable surprises, and the greater part of it was devoted to enlarging on the policies outlined at the Unionist meeting which elected him leader. He proposes to abolish the Cabinet secretariat, which has been criticized as expensive and unconstitutional by the opponents of the late Government, and to transfer British representation to the League of Nations to the Foreign Office.

He intends to ratify the Irish treaty and call the British dominions to a conference to develop Empire trade. There was no statement of policy in the management of British affairs in the Near East, and that is likely to be demanded by Mr. Bonar Law's campaigning critics.

The Prime Minister made his campaign speech at Glasgow, where, being of Scotch extraction, he had an enthusiastic welcome.

For Hiccups and Heartburn Here is a Good Prescription

Nothing brings such satisfactory relief as slowly sipping a few drops of "Nervine" in sweetened water. Nervine relieves those conditions that cause the hiccups, just as it does sour risings, gas belching and fermentation in the stomach. For acute stomach pain, bloating, nausea and similar ills, rely on Nervine. It is a true friend of every family. Sold by all Dealers, 35c per bottle.

Bonar Law Congratulated

Canadians in U.S. Send Message to New Prime Minister

New York.—The Canadian Club of New York sent a cable to Mr. Bonar Law expressing gratification that Canada had become Premier of Great Britain.

The decision to send a message to the new British Prime Minister was made at a general meeting of the club membership. The resolution instructing the president of the club to send the cable, was greeted with cheers and was passed unanimously.

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapysin" Corrects Sour, Upset Stomachs at Once

Pape's Diapysin is the quickest, surest, safest relief for indigestion, gas, flatulence, heartburn, sourness, fermentation or any of the ailments caused by acidity. A few tablets give almost instantaneous relief. It corrects your stomach and digestion now for a few cents. Druggists sell millions of packages.

Congratulates Crew of Bioscope

Ottawa—A telegram congratulating Captain Angus Walters and the crew of the Canadian defender Bioscope was dispatched to Gloucester by Premier King, on behalf of the people of Canada.

Premier King congratulated the victorious cup defenders upon their victory and also upon the splendid spirit of sportsmanship they showed during the contest.

Commander of Raleigh Dismissed Portsmouth, Eng.—The court martial in connection with the loss of the British cruiser Raleigh, off Labrador August 5, found that the chief against Commander Bolt, of the Raleigh, that by negligence or default his ship was stranded and lost, had been proved.

Commander Bolt was ordered to be dismissed from his ship and be severely reprimanded.

Release Canadian Ship

Washington.—Port authorities at New York were ordered by the Treasury to release the Canadian schooner Emerald, whose seizure outside the 12-mile limit of State Hughes declared in a statement on "navy day."

It will be on this basis that the United States would enter future conferences or make agreements for limitations. "It would be folly to undermine our position," Hughes declared.

Release Canadian Ship

Washington.—Port authorities at New York were ordered by the Treasury to release the Canadian schooner Emerald, whose seizure outside the 12-mile limit of State Hughes declared in a statement on "navy day."

WILL INVITE STATES TO PEACE CONFERENCE

NEAR EAST SITUATION TO BE DISCUSSED AT LAURANNE, NOVEMBER 13

Paris.—France, Italy and Great Britain have agreed to invite the United States to participate officially in the Near East peace conference at Lausanne, Switzerland, November 13. This decision was reached after weeks' discussion of the form of the invitation to be issued to the conference.

The suggestion to ask the United States to participate officially came from Lord Curzon, the British Secretary for Foreign Affairs. The invitation will be handed to the State Department in Washington, by the French, British and Italian embassies.

"Cascarets" 10c

Best Bowel Laxative When Bilious, Constipated

To clean out your bowels without cramping or overeating, take Cascarets. Sick headache, biliousness, indigestion, sour, upset stomach and all such distress pass by morning. No trouble on earth for grown ups and children. 10c a box. Taste like candy.

Ask For Lower Rates

C.N.R. Is Asked For Cheaper Fuel Rate From Alberta East

Edmonton.—Cheaper freight rates on coal as a form of national service has been suggested to the management of the Canadian National Railway by A. Chard, freight and traffic supervisor for the Alberta Government. The present tariff of \$12.50 per ton from Alberta mines to points in Ontario is shown to be prohibitive, and to be working seriously against development of the eastern market. A request is therefore made that a substantial reduction in the ton rate be put into effect on the Government road in order to give an opportunity for east and west to connect on the fuel question.

B.C. Liquor Question

Prohibitionists May Ask Vote On Bone Dry Law

Vancouver, B.C.—If the Provincial Government submits a referendum to the people of British Columbia with regard to the sale of beer and light wines in hotels and cafes the Prohibition Association will demand that the whole question of the liquor traffic be opened and an alternative provided on the ballot for an absolutely bone dry province.

This was a feature of the presidential address by G. O. Buchanan to 200 delegates gathered from all over the province to attend the eighth annual convention.

U.S. to Maintain Navy Strength

Washington.—The U.S. must maintain the naval strength allotted under the Washington disarmament treaties, Secretary of State Hughes declared in a statement on "navy day."

It will be on this basis that the United States would enter future conferences or make agreements for limitations. "It would be folly to undermine our position," Hughes declared.

Release Canadian Ship

Washington.—Port authorities at New York were ordered by the Treasury to release the Canadian schooner Emerald, whose seizure outside the 12-mile limit of State Hughes declared in a statement on "navy day."

Natural Resources Problem To Be Subject Of Conference At Ottawa

TO MARK ARMISTICE DAY

TWO MINUTES' SILENCE ALL OVER EMPIRE, NOV. 11TH

Ottawa.—Two minutes of silence will, by the express wish of His Majesty the King, be observed throughout the British Empire on Armistice Day, November 11. The Prime Minister has received a cable to this effect from the Duke of Devonshire, Secretary of State for the Colonies. Incidentally, the cable is practically the first official message sent to Canada by the former governor-general by virtue of his post in the Bonar Law cabinet.

The Canadian Government will also hold a special service in commemoration of the cessation of hostilities. While details are not yet completed, a service will be held on Parliament Hill about the 10th of the foot, of a company to be erected on the steps leading up to the House of Commons.

BANDITS SECURE \$3,000

MASKED MEN HOLD UP POSTMASTER IN SASKATCHEWAN TOWN AND SECURE HAUL

Moosomin, Sask.—Two bandits, with faces masked by handkerchiefs, held up J. Wilson, Gallie's postmaster, early Thursday morning and succeeded in making their getaway with approximately \$3,000 in cash. The two bandits, during their hurried examination of the postmaster's money, another money parcel containing \$2,500.

Officers of the Saskatchewan Provincial Police, hurriedly summoned by telephone, arrived in Gallie two hours after the hold-up. The bandits, however, had covered their tracks and escaped.

Gallie, a small village of 300 people, south of Moose Jaw, has a general store and post office combined, and an elevator which is operated by the N. M. Peterson Elevator Company. Funds which were stolen are stated to belong to the elevator company.

Entries For Prize Essay

Chicago.—More than 600 students at colleges in the United States and Canada have entered the contest for prizes for the best essays on "The World Movement Against Alcohol," the Inter-Collegiate Prohibition Association has announced. Winners will be announced at the international ribbons conference at Toronto, November 24 to 29.

Forward Step in Surgery

Boston, Mass.—The most important forward step in modern surgery has been accomplished with standardization of surgical technique, Dr. Frederick H. Martin, of Chicago, Director-General of the American College of Surgeons, declared here.

Ottawa.—The conference between the Dominion Government and the premiers of the three western provinces, with regard to the return of natural resources, will take place in Ottawa on November 13. It is officially announced. The announcement was made following the exchange of a number of telegrams between the western premiers and Premier Macleod King.

No question has been raised as yet as to representation of the eastern provinces in the conference. The announcement was made following the exchange of a number of telegrams between the western premiers and Premier Macleod King.

Until the western premiers arrive here the Federal Government will not learn the attitude of the new Manitoba Premier, Hon. John Buckle, toward the position taken last year by his predecessor in office, Hon. T. C. Norris. So far, Premier Bracken has not indicated whether or not he will subscribe to the agreement then reached.

Before coming to Ottawa, it is expected the Premier and other officials of the three western provinces will confer, probably in Winnipeg, in an endeavor to reach a common basis of negotiation for the return of the natural resources to the provinces.

The forthcoming conference is one of several attempts which have been made in past years to solve this difficult problem, and in respect to the natural resources of the country here express a hope that this may lead to reaching a basis from which a satisfactory agreement may finally be drafted.

A Brighter Outlook

Trade Throughout World On Up Grade, Says Expert

New York.—Business throughout the world is on the up-grade, Dr. Julius Klein, Director of the Bureau for Foreign and Dominion Affairs of the Department of Commerce, declared in a detailed analysis of world business conditions before the convention of the American Manufacturers' Export Association.

"Conditions almost everywhere show decided improvement. The outlook is better the world over, with few exceptions," Klein said.

Producing Cheaper Helium

Washington, D.C.—A new, cheaper and more satisfactory method of producing helium, the non-inflammable gas for lighter-than-air craft, has been discovered, according to a statement by H. Foster Blair, Director of the United States Bureau of Mines.

Helium gas, heretofore, has been very expensive, does away with the possibility of explosion and fire in dirigibles.

It is planned to erect a semi-commercial plant and apply the new method on a quantity production.

The Bird Man

Jack Miner Tells Story of How He Makes Friends With Wild Life

Speaking recently at Edmonton under the auspices of the Northern Alberta Fish and Game Protective Association, Jack Miner unfolded the secret that made friends with wild life. His address as reported in the Edmonton Bulletin, is well worth reading:

"I was born barefoot and brought up on three meals a day, oatmeal, cornmeal and misa-meal," said Mr. Miner, speaking of his youth. "I was corrected with the common mistake of sportsmen in speaking of the wild goose. 'It is the Canada goose,' said Mr. Miner, who told of starting in 1904 with seven wild geese which he bought, clipped their wings and kept them in the farm. 'The next year not the next, no geese stop as they passed by on their way to the north in spring or the south in fall, and they had almost given up hope, when one spring in answer to the look of their own geese a passing hawk isolated, flew around and came back. Next year thirty-two came and the next year there were 400; and the following year they could not count them."

It would have been hard to believe had the pictures not shown it to be a fact that Mr. Miner walks among them easily, that they light on a pond with in fifty feet of his back door and right beside the main road. The small boy who the goose tried to bite the arm, by throwing stones at them, but it was hard to get them interested at all. The camera recorded thousands of wild geese going over the lake, an exceptional picture showed the geese dropping straight down from the air into the pond. "I was standing direct as a plummet, their wings outstretched, acting as a parachute."

It is not only the wild ducks and geese that find a warm welcome and a safe home at the Miner farm, but robins, quail and all other bird life. Except maybe having a few of the thirteen little quail flying straight into Mr. Miner's apron; of three little robins that happily adopted the old cat for their mother and brother on her milk; of five little wild ducks, which they had tagged, and word had come back of the fate of every one. Dellah survived the longest. For six years she came back and back, every year raising a family. There were two broods of five, six and one and two and finally Dellah also succumbed to the guns of the hunter."

But the story of David and Jonathan touched the heart of everyone in the audience. These two together with their flock were lost one day when the sportsman's guns winged David and Mr. Miner had bound up the torn tendons and put him in the pond. Jonathan had refused to leave his brother. He stayed with David and the others of the clipped wings, in spite of the fact that he was strong and able to fly. Then one night a great horned owl had come down and instead of getting away by himself, Jonathan fought the owl defending those of the flock who were not so well protected. Finally the owl had sunk his beak into the old faithful head and killed him. That night a trap was hidden in Jonathan's feathers and the owl was caught. "He is a perfect gentleman the Canada gander," said Mr. Miner and had the best principles of any person I know."

But keeping "open house" to so many friends means something in the way of provisions, and the speaker told of setting forth on the guest table over 2,000 pounds of ear corn one fall in the two months that the geese were with him. They cooked the back yard and feed with the chickens. They answer when he calls them and inside of a short time they have no hesitation in coming right down to his back door. It did not take them long to realize that his home was their home and that they were in satisfactory there."

Canada May Buy Vimy Ridge
Speaking at the dedication of a military park in Mount Pleasant Cemetery, London, Ont., Mr. George P. Crampton, Minister of Militia, announced that Canada has for some time been conducting negotiations for the purchase of Vimy Ridge, it was his intention to maintain the famous battlefield as a park to perpetuate the memory of the Canadians who fell there."

Do We Want Them?
Some 20,000 Italians and 6,000 Roms are coming to Canada this spring, which probably will mean more work for the enforcement officers. Why cannot the Government secure some of the Roms who are headed toward Australia?—St. Catharines Standard.

Can Make It Talk, Can't
Blt.—They say that money talks; can you make it?

Dix.—Sure! I can make every penny cough.

Princess Mary Is Model Housekeeper

Follows General Principles as Taught by Her Mother

Princess Mary, according to the court gossip, is ably carrying out the royal tradition of good housekeeping started by Queen Victoria and preserved by Queen Mary, although it was badly broken by Queen Alexandra. The Princess, it is said, is following the general principles of housekeeping she learned under her mother's tuition.

She allows a certain run to her housekeeper for the most part, as the penses of Chislehurst House. Once a week she holds a domestic council in her boudoir, checking up the housekeeper's ledger to see if any items can be cut down or cut out.

One of Queen Mary's favorite maxims in running royal establishments is, "It is unwise to be parsimonious; it is foolish to be extravagant." And the Princess adheres to this sentiment.

For instance, she is very particular that lights should not be burned in rooms not being used. In many big London mansions the main living rooms are lit from dusk to bedtime whether occupied or not. Consequently Princess Mary's living halls are said to be 15 per cent. less than those of other great social establishments.

She is fortunate in having a first-class housekeeper, who is the assistant at Buckingham Palace and with the Queen's permission, goes with the Princess on her marriage.

The Princess frequently visits her mother and follows the latter's housekeeping practice, her mother having often said to her:

"When you have a household of your own you must neglect the kitchen. A well conducted kitchen is the basis of good housekeeping."

Provincial Farms

Revenue for Saskatchewan Government Last Year Was \$100,000

The greatest farming organization in Saskatchewan—the Provincial Government—has harvested the largest and most valuable crop in the history of its agrarian operations. At the jalls and mental hospitals of Saskatchewan, the Department of Public Works, under the leadership of Mr. J. G. Macdonald, has more than 5,000 acres under cultivation in addition to being in the live stock business on an extensive scale. Practically all the work on these institutional farms which are located at Regina, Moosemilk, Battleford, Weyburn and Prince Albert is performed by the prisoners of the jalls and the inmates of the mental hospitals. The value of the crops from the various farms passed \$100,000 to the Government's coffers, and this figure this year will be increased by a further amount.

"One of the biggest problems in connection with the jalls," declares the superintendent of these agrarian farming operations, "is finding work for all the prisoners. Large as the farm in Regina is, it does not supply nearly enough employment for the inmates we are forced to accommodate."

One result of this work, aside from the economic production is seen in the fact that the work of raising pure-bred livestock has resulted in a few of the prisoners taking up this occupation after the completion of their sentence and some have shown exceptional ability in the work.

Celebrated Jubilee Of Cable Enterprise

Part of World's History

Greatly increased in the province of Great Britain, in the celebration of the jubilee of the cable company, the jubilee of a group of submarine cable companies which have developed a huge and successful system of cables in many parts of the world. With the cable company was formed there were only eight thousand miles of cable in existence. Today there are 225,000 miles. The whole of the capital and technical skill and commercial enterprise for this great business came from Great Britain. The cable company has been a great physical difficulties. The lead which Great Britain took in submarine telegraphy, the first successful commercial experiments in which were conducted in British waters, while the first company to work wire communication on a business basis was also formed in Great Britain.

Southern Alberta Crops

Crop reports for various sections of Southern Alberta, while differing according to locality, show some very satisfactory results. At High River a field of about 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Red Deer a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Lethbridge a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Medicine Hat a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Swift Current a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Yorkton a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Weyburn a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Regina a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Saskatoon a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Swift Current a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Yorkton a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Weyburn a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

At Regina a field of 40 acres averaged 45 bushels a bushel No. 1 hard, weighing 65 pounds to the measured bushel. A field of 240 acres averaged 30 bushels to the acre, which is above the general average of production.

A FINE FIELD OF SUNFLOWERS

This view shows a portion of a seventeenth-acre field of sunflowers on a farm near Humboldt, Sask. The crop was grown by Mr. Sam McCreck. The photo was taken on Sept. 29. A crib also was built to store this crop.

Novel Fishing Methods

Malay Natives Put Drug in Water to Stupify Fish

The most curious method of fishing that is employed by the natives who inhabit the upper reaches of the rivers of the Malay Peninsula.

When they decide to go fishing they send messengers to the other villages down the river to warn them that the water is going to be poisoned. Then two kinds of trees are "tapped" for their sap. Although the saps are quite harmless apart, when the two are mixed with the waters of the river they become a strong stupifying drug.

This drug is thrown into the river, turning it milky white, and immediately all the fish come to the surface—doped. Canoes are used to collect the fish, for in a few hours the stream has cleared and the fish have revived.

The river Tigris contains surprising numbers of huge fish, which are brought up by the natives. The ordinary methods of hook and line do not appeal to the Arab, who likes to do things in the easiest possible manner. He uses a net occasionally, but that is of little use for catching the real big fellows.

When he goes after the fish he proceeds to ground-bait the river with dough; not the innocent compound of flour and water used for making bread, but a thick sticky paste into which a quantity of opium has been mixed.

Any fish that makes a meal of this is quickly stupified and floats to the surface. The fisherman then mounts an inflated goat skin and goes out to collect his bag.

"Things have not changed much on the Tigris in the last 2,000 years. The boats used now are identical in shape with those seen in Babylonian sculptures, and the goat skin floats have been employed in Mesopotamia for more than a hundred generations."

Economy Was Costly

Jeweler Found Cutting Expenses Does Not Always Pay

Thinking to save money a jeweler discharged his regular salesmen and hired an inexperienced boy. When he returned from lunch he said: "Well, Frank, did you sell anything while I was out?"

"Yes, sir. I sold five plain hand rings."

"Fine, my boy, fine!" said the jeweler, enthusiastically. "Well, make a salesman out of you one of these days. You got the regular price for them, of course?"

"Oh, yes, sir. The price stamped on the inside was 18c and the man took all that were left, sir."—Boston Transcript.

Britain's Youngest Lieutenant-General

His Charge is Horvath, who is 60

is the youngest Lieutenant-General in the British Army, rose to fame in the war, which found him a junior Major in the Liverpool. After two years he was Chief of Staff to the Second Army under Lord Plumer, when he helped to organize the attack on Meuse in 1917, and then followed to Italy. The next year he became Deputy Chief of the General Staff, and in 1920 Commander-in-Chief of the British Army of the Black Sea.

May He Die

The pupils had been writing a history essay, and when the teacher was correcting the papers she was puzzled to find this remark in one of them: "King John died bald."

On being questioned, the boy who had written the remark said: "Well, teacher, you said he died without heirs!"

A Rude Suggestion

"Marie, you'll never be able to find that mail with a fat lion. For heaven's sake use your head," admonished her husband, who said: "Well, teacher, you said he died without heirs!"

Why she wouldn't speak to him for the rest of the day.

World's Crop Reports

International Institute at Rome Gives A Remarkable Service

The most remarkable institution in the world is the International Institute of Agriculture which was set up in Rome before the war.

It collects from all the world, and distributes to the right persons in every country, information about every department of agriculture. It publishes crop reports and monthly reviews in English, French, Italian and Spanish.

The institute circulates invaluable information about new methods, machinery, plant diseases, animals, poultry and insects, and sends them straight to the Family Herald and some other newspaper offices.

Here we have an example of what will some day be the common practice of mankind about all good things. Every branch of human activity will be brought under the world-wide organization. — Montreal Family Herald.

What Becomes of Rainfall

Greatest Amount Absorbed By Plants and Redistributed

One ton of water to three pounds of flour is nature's recipe for making wheat bread, according to figures on rainfall published by the Bureau of Soils of the Department of Agriculture.

By controlling the water supply in irrigation, accurate measurement is possible, and this estimate is of the minimum requirement. Many crops need five times as much water.

"What becomes of all the water?" Of a ton of water falling on a dozen square feet of soil during the year, about one-third is absorbed and is drained off underground. Only a little runs off the surface if the field is well ploughed. A little evaporates immediately and the rest is held in the soil. As the surface dries, the moisture in the soil soaks up by capillary attraction and evaporates off the surface. But by far the greater amount is drunk by the roots and plants, and runs up into the leaves and is wasted in vast quantities into the atmosphere.

Most Inaccessible Place in World

No Land Birds Or Native Animals On Easter Island

Professor MacMillan, who has returned to Sydney, N.S.W., from Easter Island, which he says is the most inaccessible place in the world. There are no land birds or native animals, and once small grey rats were used as currency and ultimately served as a tribute for the aristocracy.

Professor Brown examined the huge famous stone images in human form standing on great stone platforms, which were carved by the natives of the island. Some of the statues are of immense size, fully 70 feet in height, and crowned by huge stone heads.

The professor believes that tens of thousands of workmen erected the monuments to the people of a bygone Pacific Empire inhabiting the ring of archipelagoes of which Easter Island is the centre.

Dairying in Saskatchewan

Dairying in Saskatchewan is making rapid progress according to a statement by Mr. J. G. Robertson, Live Stock Commissioner for the province.

"The demand for dairy stock is so great," says Mr. Robertson, "that it cannot be filled with western-bred cattle. The department is endeavoring to meet the need, and this year 42 head of dairy cattle, mostly eastern-bred, have been supplied."

A Woman's Idea of a Perfect Husband

A woman's idea of a perfect husband is one who would leave a bathroom as tidy as he found it.

Rural Credits in Canada

Provincial Legislation Under Which Financial Assistance Is Available to Agriculture

The national growth of Canada depends upon the development of her natural resources. This is particularly true in the case with regard to the settlement of land and agricultural production. Coincident with this and of major importance is the question of rural credit. The prospective settler must of necessity be in a position where he can secure the use of funds for development, either for the establishment of a home or the extension of his farming operations, such as fencing his acreage for cropping purposes, or adding to the numbers of his livestock.

This condition has been recognized by practically every province in Canada, and legislation has been enacted to provide for a system of credits of variable lengths and at reasonable interest rates.

The importance of placing this information in the hands of the agriculturist and prospective settler has been the Natural Resources Intelligence Branch of the Department of the Interior to publish a synopsis of the rural credit legislation in Canada in pamphlet form. Copies will be supplied free on application to the above branch, or will be forwarded direct to those contemplating settling in Canada, upon receipt of address.

Sugar Crop On Increase

More Being Grown Than For Several Years Past

There will be more sugar for everybody this year, as more is being grown than has been the case for several years past.

The latest advice shows that the world's crop for the current year will yield over seventeen million tons of sugar as compared with rather more than sixteen and a half millions last year, and just over fifteen million tons the year before.

Of course, owing to the war, the European beet crop almost disappeared last year, but the feature of the French crop are very good indeed, half as much again is being produced in that country this year as was produced last year.

The Cuban crop is rather less than last year, but many countries are now growing sugar in large quantities for the European market that previously sent little or nothing for their use.

The consumption of sugar has increased by leaps and bounds since the Armistice, and, although the quantity of sugar is greater, there is an ever-growing demand.

Diameter Of Known Universe

No Mind Can Comprehend Vast Number of Miles

The Lowell Observatory, Harvard, has recently observed a portion of the heavens to a new cluster of fainter, farther stars which indicate that the known universe has a diameter of at least 2,100,000,000,000,000 miles.

No comparison, no analysis or prodigy of the figure can aid in comprehending it. It helps not at all to say that the distance is 84,000,000,000,000 times the circumference of the earth; or that it is 25,000,000,000 times the distance from the earth to the moon; or that it is 25,000,000,000 times the distance—light inconceivably vast—from us to our sun. The space of light is the earthly maximum of speed, yet from one end to the other of this stellar system light spends 25,000 years in travelling—No World.

Some Men are Too Intellectual to Be Intelligent

Some men are too intellectual to be intelligent.

A total of 156 varieties of minerals have been discovered in Wyoming.

Official Hog Grading

Regulations Under Which Work Will Be Undertaken Has Been Approved

The regulations under which the official grading of hogs will be undertaken have been approved by the board as submitted after final agreement by all interests represented by the Joint Swine Committee. The swine graders appointed through the Civil Service Commission following the grading examinations have reported for duty to the Dominion Livestock Branch at Ottawa.

The Honorable W. R. Motherwell, Dominion Minister of Agriculture, announces that the hog grading regulations have been made effective at Quebec, 20th, 1922. In the meantime, the new hog grading staff is being given a thorough course of instruction at the Toronto Stockyards, so that the official grading regulations as established will be uniformly applied at all stockyards and abattoirs in Canada.

Standard grading equipment is being adopted and is already installed at several stockyards where preliminary grading tests are being conducted and the necessary adjustments to expedite the grading and movement of hogs are being made. The necessary adjustments to expedite the grading and movement of hogs are being made. The necessary adjustments to expedite the grading and movement of hogs are being made.

Free Seed Testing

Work Has Been Undertaken By University of Saskatchewan

A forecast of the seed testing work that will be carried on this winter by the Agricultural Experiment Station of the University of Saskatchewan, was received by officials of the Department of Agriculture from Professor Manly Champlin.

The work will be the first of its kind in the province and will be the result of the co-operation of the Department of the University of Saskatchewan. The tests will not be "official," but the results will be valuable, and the feature of the seed they are using, whether it will grow and whether it is pure.

Seeds which will be tested include all the common crops, wheat, oats, barley, rye, flax, sweet clover, peas, alfalfa, broomrape and corn.

While the Dominion Seed Law provides that seed-testing in germination and purity shall be done by the Dominion Government laboratories which are located at Winnipeg and Calgary, so many citizens of Saskatchewan have been so interested in the feature of the seed they are using, whether it will grow and whether it is pure.

India Desires Self-Government

Necessary to Alight Agitation, Says Sir S. Aiyer

"India desires self-government and without the right to self-government, no rest in that country is to be attained. If it is withheld, it means that bitter antagonism towards, and hatred of, Great Britain will become more deeply embedded in the hearts of the native population."

In these words, Sir S. Aiyer, K.C.S.I., leader of the National party in the legislative assembly in India (corresponding to the House of Commons in Great Britain) who was one of the representatives of British India at the League of Nations meeting at Versailles, last September, expressed himself prior to his departure for Vancouver.

Some Things Worth Knowing

A hard, apparently useless paint brush may be restored to service by scouring it with a hammer, after which it may be used for painting turpentine. Once in a useful condition the brush should be allowed to stand in water.

A large sized grocery box, if painted or enameled on the outside, can be made into a pretty and useful box.

An old broom handle makes an effective crutch pole.

A tin can may be formed on a lathe or by dipping the end into hot sealing wax.

A faded carpet may be largely restored to its original color by brushing with turpentine and water.

It has been ascertained that apples possess a susceptibility to musical sounds.

Bar B Ranch,
November 29th, 19—
Seven weeks back since I wrote in
my diary? But for Mrs. Hingham
it might have been even longer. A
few days after we had been to Car-
ton City to the Exhibition I woke with
a splitting headache and a sore throat
I dressed and went down to breakfast,
but could not eat anything. Mrs.
Hingham became anxious, took my
temperature and found it above nor-
mal, looked at my tongue, then sent
me back to bed, and dispatched Mr.
Hingham to the Agency with orders to
bring Dr. McMurray back with him as
soon as possible. The doctor was
not at the Agency and Mr. Hingham
had to ride an additional ten miles be-
fore he found him, and it was not un-
til late in the evening that they reached
the Bar B. All day I felt wretched,
dizzy, and when the doctor came he
made a hasty examination, asked a
few questions, and then provided
"Scatter fever." All the rest of you
had it!

I was surprised and dismayed, but
Mrs. Hingham was neither. "You
all had it, except Sunny, and I can
easily keep her out of danger. I'll
go into quarantine with Miss Eliot.
Mrs. Davidson will be glad to come
and keep house for me."

"Can I go to the hospital?" I asked.
"I shall be an awful nuisance to
you all if I stay here."
"I suppose you would have to leave
nearly, too, do you?" questioned the
doctor, rather un sympathetically, I
thought. "No, young lady, you
stay where you are—and thank your
lucky stars that you have a good
nurse to look after you."

"I felt too ill to remove farther, and
it was several days before I was
able to appreciate Mrs. Hingham's
devotion. She said I had
had someone else to look after me,
but she must have been very anxious
about Sunny, but she never so much
as hinted that she was making any
sacrifice. In fact, even now she re-
fuses to let me thank her, and when I
try to do so she only laughs and tells
me that she was delighted to get into
uniform again, and to have a patient
to tyrannize over." She was a nurse
before her marriage.

She moved me into an unoccupied
bedroom which opens on the balcony,
and there we lived for six weeks—
six months, it seemed to be. For a

couple of weeks I was too ill to be
laid, but after that each day was
longer than the preceding one. I had
to stay in bed for four weeks, and
even now I feel very wobbly about the
matter. The doctor says that my
heart is not very strong and that I
must avoid all exertion for some time.
My recovery was so good to me, as
soon as I was able to listen to the
concerts, assisted by Mrs. Davidson,
she evolved himself in the form of
dishes that would have tempted the
most fickle appetite. Mrs. Little
brought me fresh eggs, few at a
time, whenever she had a chance. And
sometimes, Miss Marshall—she
prefers to be called "Miss Little"—
wrote a very kind note, offering to
bring me fresh eggs, and Mrs. Hing-
ham should be needed at any time.
And letters! Mrs. Hingham wrote twice a
week—long, rambling, funny letters,
which were almost as good as a visit
from the writer. Gladys Pike, who is
now in Winnipeg attending college,
wrote each week, telling me all the
latest news. And I had a very char-
acteristic epistle from Mrs. Mills—I
was so sorry that it had to be burn-
ed—Mr. Hartford, Mr. O'Hara, and
the twins added postscripts, and the
resulting manuscript was so weighty
that I required double postage.

I had a private system of postal
orders too. Mr. Livingston and
Sunny used to write the quaintest let-
ters to me and not that on any
time and energy, and all because they
do not know that a man's intention
for a nurse is not one sign in his
conscience. My experience in this
respect has not been very wide, but
some nurses I know could tell you
that they would make you open your
eyes. The girl I roomed with when
I was in training had one typical
nurse who used to quote "As soon
as she is coming, my own, my sweet,
I'll be with you, but even when he was
out of danger and supposed to be quite
recovered, he stopped reading 'Maui'
only to tell Molly whenever he had
the chance that it was the very im-
age of the only girl he had ever loved.
Molly was the worst girl I ever
knew, but she kept in practice by ex-
pressing on everyone from the vic-
timized to the perpetrator. And when-
ever I remonstrated with her, she
would excuse herself by saying that
she was doing it for her own good,
and books and cards failed—when I
kept him from being bored to death."

(To be continued)

Cardinal Vaughan and Dr. Adler,
the chief Jewish rabbi, were next
to each other at a luncheon. "Now
Dr. Adler," said the Cardinal, "when
I may have the pleasure of helping
you to some lunch?" The rabbi re-
plied without a pause: "At your Em-
inence's wedding." A reply that
for appropriate neatness would be
hard to improve upon.

Relieve Asthma at Little Expense.
Thousands of men and women who
spend upon remedies for asthma and
asthma, it ever, with more time. Dr.
J. D. Kellogg's Asthma Remedy, de-
spite its assurance of benefit, costs
less than a box of matches. It is the
national remedy for asthma, far
removed from the class of dangerous
and experimental preparations. Your
dealer can supply it.

THE DEVIL'S FISH
A Bit About Devil Fish.

"O you know what a Bat is?" Stella, the Wishing Fairy, asked
one of her Brownies one day at the End-of-the-Earth, "and you
know what a Devil Fish is?"

"Puzzle, the most adventures of the four Brownies, always
has an answer of some kind for every question, so of course he
had one ready for this question, as he goes away all the time
on trips of adventure.

"Yes, I know," he cried, "a Devilfish is an Octopus—one of those enor-
mous sea creatures which have such long, strong, twisting arms."

"As you see," he explained, "a Devilfish is ever so different from an
Octopus—another name for a Devilfish is a Snake. Perhaps you have heard of
it by this name."

"Yes, I know," Stella said as she showed the Brownies the picture
she had drawn. "The Devilfish looks very much like a Snake, which, by the way,
is called a Devilfish because it is so dangerous and deadly."

"The reason people so often make the mistake of calling the Octopus a
Snake is because it is so dangerous and deadly. It is so dangerous and deadly
that it is called a Devilfish because it is so dangerous and deadly."

"As big as twenty-four feet across," answered Stella, "and they often
weigh as much as two tons!"

"Pretty heavy for a mere Fish!" exclaimed the Brownies.
"Well," laughed the Fairy, "it's all have twelve arms in the Get-Little
Pool and then play hide-and-seek. Who wants to come along?"

"No!" laughed the Brownies.
"And no, too," cried Stella, and ungrammatically.
"Lay Lorkins was just taken. The Snake had been too much for him!"

ZAM-BUK
Nothing else known to
science performs the same
marvellous healing and dis-
pels disease from the tissues
as Zam-Buk does. This
pure herbal balm takes the
fire out of a wound or sore,
kills and repels germs,
and grows fine new skin.
Zam-Buk is acknowledged
**THE WORLD'S
GREATEST HEALER**

nearly always adds the last touch to
the remedy by trying to counteract
the nurse's influence. Poor old
ladies! They waste a lot of valuable
time and energy, and all because they
do not know that a man's intention
for a nurse is not one sign in his
conscience. My experience in this
respect has not been very wide, but
some nurses I know could tell you
that they would make you open your
eyes. The girl I roomed with when
I was in training had one typical
nurse who used to quote "As soon
as she is coming, my own, my sweet,
I'll be with you, but even when he was
out of danger and supposed to be quite
recovered, he stopped reading 'Maui'
only to tell Molly whenever he had
the chance that it was the very im-
age of the only girl he had ever loved.
Molly was the worst girl I ever
knew, but she kept in practice by ex-
pressing on everyone from the vic-
timized to the perpetrator. And when-
ever I remonstrated with her, she
would excuse herself by saying that
she was doing it for her own good,
and books and cards failed—when I
kept him from being bored to death."

(To be continued)

Cardinal Vaughan and Dr. Adler,
the chief Jewish rabbi, were next
to each other at a luncheon. "Now
Dr. Adler," said the Cardinal, "when
I may have the pleasure of helping
you to some lunch?" The rabbi re-
plied without a pause: "At your Em-
inence's wedding." A reply that
for appropriate neatness would be
hard to improve upon.

Relieve Asthma at Little Expense.
Thousands of men and women who
spend upon remedies for asthma and
asthma, it ever, with more time. Dr.
J. D. Kellogg's Asthma Remedy, de-
spite its assurance of benefit, costs
less than a box of matches. It is the
national remedy for asthma, far
removed from the class of dangerous
and experimental preparations. Your
dealer can supply it.

THE DEVIL'S FISH
A Bit About Devil Fish.

"O you know what a Bat is?" Stella, the Wishing Fairy, asked
one of her Brownies one day at the End-of-the-Earth, "and you
know what a Devil Fish is?"

"Puzzle, the most adventures of the four Brownies, always
has an answer of some kind for every question, so of course he
had one ready for this question, as he goes away all the time
on trips of adventure.

"Yes, I know," he cried, "a Devilfish is an Octopus—one of those enor-
mous sea creatures which have such long, strong, twisting arms."

"As you see," he explained, "a Devilfish is ever so different from an
Octopus—another name for a Devilfish is a Snake. Perhaps you have heard of
it by this name."

"Yes, I know," Stella said as she showed the Brownies the picture
she had drawn. "The Devilfish looks very much like a Snake, which, by the way,
is called a Devilfish because it is so dangerous and deadly."

"The reason people so often make the mistake of calling the Octopus a
Snake is because it is so dangerous and deadly. It is so dangerous and deadly
that it is called a Devilfish because it is so dangerous and deadly."

"As big as twenty-four feet across," answered Stella, "and they often
weigh as much as two tons!"

"Pretty heavy for a mere Fish!" exclaimed the Brownies.
"Well," laughed the Fairy, "it's all have twelve arms in the Get-Little
Pool and then play hide-and-seek. Who wants to come along?"

"No!" laughed the Brownies.
"And no, too," cried Stella, and ungrammatically.
"Lay Lorkins was just taken. The Snake had been too much for him!"

Germany Producing Tons Of Nitrogen

Has More Than Doubled Output Since
the War

"Germany today is in a far better
position to wage another war than
Great Britain, England is dismantling
her ammunition plants, while Ger-
many is increasing her production of
ammunition. This statement, has
been made before the British Associa-
tion by Dr. J. A. Marker, formerly
director of research in the Ministry of
Agriculture.

Dr. Marker declared he was not an
alarmist, but simply recited facts as
they stood. In 1913 Germany pro-
duced 80,000 tons of nitrogen chiefly
for agricultural purposes, he said,
while the smaller Germany of today
has produced more than twice this
amount.

"At the end of this year Germany
will have at her disposal," Dr. Marker
went on, "an internal capacity for pro-
ducing 200,000 tons of nitrogen a year.
This will make her entirely independ-
ent of all nitrate importation, and in
case of another war she will have all
the basic materials for a gigantic out-
put of munitions and enough fertilizer
to grow a large share of her food."

"It may be justifiable," he con-
cluded, "for the allies to allow our late en-
emies to put themselves in so strong a
position so soon after the war, but it
may also be that those whose func-
tion is to eat and sleep, and who are
the provisions of the treaty are car-
ried into effect, are not aware of what
is happening."

It Works Wonders On Colds, Catarrh, Bronchitis, Weak Throat

When your throat rattles, your
nose runs and are sore, your throat
is stuffed with cold—don't fear com-
plications. Use Catarrhine. It
clears the throat, stops
coughing, relieves light chest and sore
throat, and relieves all bronchial troubles.
Use Catarrhine the nose nothing
but Catarrhine. Catarrhine
Nature's own remedy—it heals
colds—removes every form of
catarrh—relieves all throat trouble.
Prescribed by many specialists
and used by thousands every day.
The dollar outfit; it lasts two months.
Write for a trial size. Catarrhine
Dealers or the Catarrhine Co., Mon-
real.

Widow's Mite Brings Fortune
Reduced to such straits that she
had to sell the only security she possessed
—a municipal premium bond issued
at \$20—a Chelmsford widow named Mas-
quellier took her sole remaining treas-
ure to the nearest stockbroker for sale
at the current price of the day—about
115. To her astonishment the broker
informed her that the bond had been
drawn 12 years ago, and was entitled
to a price of \$30,000.

Health cannot be looked for in the
child that is subject to worms, be-
cause internal disturbances that retard
development and cause serious weak-
ness. Mitty's Worm Powder keeps
worms and are so beneficial in their
action on the system of the little
sufferers are restored to healthfulness,
all the discomforts and dangers of
infestation are removed, and satis-
factory growth is assured.

Employer—"The boy I engage must
be a candidate for job." "I'm the
man." "I've just shared 'the 12
other chaps who were waiting to see
me."

RHEUMATISM?
You Have the Most Valuable Asset
You Own. You cannot afford to
Neglect It.

Crofton, B. C.—"I was troubled for
years with inflammatory rheumatism
and rheumatic fever. I tried sev-
eral cures, but did not get any
benefit from any of them.
I was constantly working, separating
the bones from the blood. I was
in the hospital for a long time, but
I was not able to walk. A
doctor advised me to try Dr. Pierce's
Remedy for Rheumatism.

After taking the first bottle I began
to feel better. After taking six
bottles I was able to walk. I was
able to work again. I was
able to take for rheumatism. I
have never been troubled with
rheumatism since. I have
been able to walk. I have
been able to work. I have
been able to take for rheumatism.

People are realizing that the kid-
neys, just as do the lungs, need
to be washed occasionally. The kid-
neys are an eliminative organ and
are constantly working, separating
the poisons from the blood. If they
are not washed, the system is clogged
with poisons, and the result is
rheumatism, neuritis, dropsy
and many other ailments.

This can be avoided by stimulating
the kidneys to increased action, and
because of its tendency to be over-
worked, many people would do well to get
Dr. Pierce's Astringent Tablets which
are to be had everywhere at almost any
drug store or send to Dr. Pierce's
Laboratory in Bridgeport, Ont., for
trial package and write for free, con-
sidential medical advice.

OLD CHIMNEY
The Tobacco of Quality

New Eastern Canada Booklet
A new edition of the booklet en-
titled "Eastern Canada," issued by the
Department of Immigration and Coloniza-
tion, has just been printed and is
ready for distribution. The booklet
brings information concerning the ag-
ricultural opportunities in the eastern
provinces of Canada up to date.

MOTHER!
Move Child's Bowels with
"California Fig Syrup"

"I solemnly adjure it upon my son,
as an indispensable duty, that as
soon as he conveniently can after my
decease, he cause my body to be
wrapped in 12 yards of wool cloth,
and buried until it is entirely com-
muted."

The request was carried out by the
son, and was the beginning of crea-
tions in America.

Saskatchewan Butte
Shipment Sent to England Meets With
Favorable Reception
Two cars of Saskatchewan creamery
butter were sent next to one of the
large British produce houses in Eng-
land some weeks ago met with a fa-
vorable reception on the English mar-
ket. According to reports received by
the Provincial Department of Agricul-
ture. This was the first shipment
made direct from Saskatchewan to a
British firm under Government guaran-
tee certificate this year.

Saskatchewan is rapidly forging
ahead as an endeavor to become the
premier dairy province of the Domi-
on. Thirty-four of the fifty-five
creameries operating in the province
are equipped with mechanical retri-
erator plants and an aggregate refri-
geration capacity of 1,859,070 cubic feet.

Not One of the Firm
Negro Porter's Explanation Might
Have Been Misunderstood
Just after closing hours one day at
the offices of Kuhn, Loeb & Co., it was
discovered that some very important
papers had to be delivered to J. P.
Morgan, of the J. P. Morgan Company,
and that there was no one left in the
establishment to deliver them except
the negro porter.

The importance of conveying the
papers was so great that it was at
last decided to immediately dispatch
the papers to J. P. Morgan's hands.
Upon his arrival at Morgan's offices
has explained that he must see
J. P. Morgan, of the J. P. Morgan Com-
pany, in person on an important mat-
ter. He finally reached the big finan-
cier's exclusive retreat and asked if
J. P. Morgan, of the J. P. Morgan Com-
pany.

"I am," condescended Mr. Morgan,
"and who are you that comes on
such an impudent errand?"
"Bah," replied the negro haughty-
ly, "I am the son of Kuhn, Loeb &
Co."—Judge.

Who Helped the Turk?
Turkey was crushingly defeated
in the world war and exhausted by it.
Without money or credit it was not
believed that it would be possible for
her to make war. But make war she
did, and with terrible effectiveness.
Those who enabled her to do so must
stand convicted before the world as in
part responsible for the awful fate of
Europe—Indianapolis News.

Minard's Liniment For Diets
Income regular and feels much better
since she began taking the Vegetable
Compound and attends school regu-
larly—Mrs. John Toms, Bat St.,
Coburn, Ontario.

Every mother who has a daughter
suffering from such symptoms should
give Lydia E. Pinkham's Vegetable
Compound a trial. It is prepared
from roots and herbs, and is gentle
and safe for young or old. It is
taken in compound by young or old.
Many, many women owe their good
health to the purity of
Lydia E. Pinkham's Vegetable Com-
pound.

The Kidneys

The office man and the outdoor
worker suffer alike from derange-
ments of the kidneys.

Backaches and headaches are
among the symptoms. In some
cases Bright's disease soon de-
velops, other suffer from high
blood pressure until hardening of
the arteries sets in.

In order to forestall painful and
fatal diseases prompt action should
be taken at the first sign of trouble.

Mr. A. D. MacKinnon, Kirk-
wood, Inverness county, N.S.,
writes:

"I can highly recommend Dr. Chase's
Kidney-Liver Pills to all suffering from
weak kidneys. I suffered from kidney
disease for a long time. I may also say
that for three years I was nearly always
troubled with headaches, and no treat-
ment seemed to do me any good.
My temper, irritability, and my
memory failed. I was finally cured
of Dr. Chase's Kidney-Liver Pills, and
after using a few boxes was completely
relieved. I have also used Dr. Chase's
"Cure" with the "Laxative" and
never fail to recommend these wonderful
remedies."

Dr. Chase's Kidney-Liver Pills,
one pill a dose, 25¢ a box, at all
dealers, or Edman, Bates &
Co., Limited, Toronto.

Seizing J. P. Morgan's Coal

NEWBURGH, N.Y., November 14.—William Perkins, Orange county fuel administrator, was distributing among residents of Highland Falls 530 tons of coal which he said was seized on the estate of J. Pierpont Morgan in that village. Investigation of complaints that only 85 tons of coal had been received in Highland Falls in three months, Mr. Perkins said, disclosed that 438 tons had been delivered to the Morgan estate. This was moved

Burdett News

From our own Correspondent

Mr. Phil Peters of Columbus is a business visitor to Burdett

John Johnson son of Adolph Johnson left last week for Calgary where he will attend the Technical School, studying Electricity

The Burdett Women's Institute held their monthly meeting on Wednesday last with about 15 members in attendance, after the business of the day was disposed of Mrs. E. Jabb read a very interesting report of the convention at Coalville, showing that she had made good use of her time while there. Mrs. G. H. Johnston then read a paper on the Province of Quebec

The Ladies of the R.S.A.B. were out in full force on Saturday sending Poppies to the extent of \$41. The Poppies were very pretty and although it is hard times, there are none so poor that they could not spare ten cents to help those who are poorer and that is the way nearly everyone felt, the Ladies meeting with very little regrets

Mr. Scott and Mr. Ranny of the Supervisors Dept. of the Standard Bank, Calgary, were here on an inspection trip this week

Mrs. Jas. Neil and family moved into town last week, for the winter

Mr. D. H. S. Turner is relieving at C. P. R. Station during the absence of the agent, Mr. C. Henderson

Born, to Mr. and Mrs. Wm. Spear on 14. November, a son.

WINNIFRED

Mr. John Schell of Ratzkow is visiting at the home of his daughter Mrs. Ted Winchcombe

Tommy Dunn returned last week from a 10 days trip to Calgary visiting friends

Mr. Fred Mervyn of the Experiment of Farm, Lethbridge is the guest of his brother R.H. 5 miles north of town

GREEN-FOWLER

The wedding took place at the First Baptist Church, Lethbridge, on Tuesday Nov. 7th. of Miss Eve May Fowler, late head nurse in the Taber Hospital, and more recently of Galt Hospital Lethbridge, to Thomas William Green, editor and publisher of the Taber Times. The ceremony was performed by Rev. Mr. Wood, pastor of the church in the presence of a few intimate friends. The couple will reside in Taber, where the bride has been previously well and favorably known. A smoker was held in the G.W.V.A. Hall, Taber, Thursday evening, to mark the event

Pantry Sale

The Ladies' Aid of the United Church held a bazaar, on Saturday December 2nd, of Fancy Goods and Useful Articles, Pantry Sale etc. Watch for further announcements. Advts.

Ray Sandy and John Judd left last week for Portland, Oregon, where they expect to spend the winter

Bobbie Burns and Robert Campbell left the first of the week for Rockford, Ill. and Mr. Ben Aaring left Wednesday for New York City, where Bobbie will join him and they will sail together for Buenos Ayres, Argentina, S. A.

Steamship On Fire

The steamship Musonino is affre 75 miles southeast of Cape Hatteras and her crew is in jeopardy, according to a wireless message picked up last Saturday by the Langley field station

"Fatty" Arbuckle's Days As Film Star are Ended

NEW YORK, Nov. 14.—Roscoe ("Fatty") Arbuckle's film career is at an end, at least so far as Paramount Pictures Corporation is concerned. This company has been the distributor of Arbuckle pictures for the last few years. It was announced today that the Paramount Corporation has definitely decided to scrap Arbuckle's last pictures, unrolled at the time of his trial in connection with the death of Virginia Rapp. The pictures three in number, are said to have cost \$50,000 to produce

Three Arrests In Nemiscam Case

Three arrests on suspicion of being concerned in the robbery at Nemiscam where the safe of the Stacey Lumber Co. was broken open, and \$2500 taken, have been made in the city, on behalf of the A.P.P. Dan McVey and Angus Blue were arrested by Det. Sgt. Egan and Wallie, and Bert Johnson by the A.P.P. The men will appear before the magistrate in due course

Two Dead From Gas

MONTREAL, Nov. 13.—Because they forgot to turn off their gas jets in their kitchen prior to retiring on Saturday night, Mr. and Mrs. Arthur Suprenant, 25 and 20 years old respectively, are dead. Mrs. Suprenant died in the night and her husband succumbed early in the morning

E. M. JOHNSTON

BURDETT

ALBERTA

Jehovah to aid Britain and U.S.

CHICAGO.—Wittor Glen Voliva, overseer of Zion City, has pronounced a prophecy, gleaned from between the lines of scripture, he said of a forthcoming world war in which England and the United States will succor the Jews from the ravages of all other peoples

There will be three alliances of nations, according to Voliva, Russia, Japan, China and Germany, under the leadership of Trotsky will form one; nations of western Europe, appearing as the 10 horns that Daniel saw in his interpretation of Nebuchadnezzar's dream. The third comprises the United States and Great Britain, hand in hand with Jehovah, the third

All of the fighting, according to Voliva, will be over the Jews and their desire to fulfill Biblical prophecy to restore Palestine. Trotsky, he said, would try to overrun the Holy Land on horseback, carrying out a prediction found in Ezekiel. The devastation will start as soon as they get the horses he said.

In the meantime, however, Voliva saw Israel as saved by American and British aviators flying with their planes filled with Jews toward Palestine

No Free Seed Grain Relief In The Future

Hon. George Hoadley Enunciated Policy Alberta Government Will Follow

CALGARY.—"One of the greatest lessons to be learned is that there is no such thing as 'easy' money, and that it is a misnomer to say that the government can pay for anything; it is the state that pays for it first, last and all the time"

It was with such language that the Hon. George Hoadley provincial minister of agriculture, told the delegates attending the Alberta Association of Municipal Districts at their convention on Friday morning that no one need look to the Alberta Government for any assistance in the future in the way of free seed

"We have to look facts in the face whether in connection with seed relief or anything else," he commented, "if you start a prize at a fair, you and money out of the taxpayers' pockets" He emphatically declared that while the government would make provision for seed grain for the coming year this would only be available to the people who could pay for it."

Auction Sales

Anyone wishing to have Mr. James Larsen the Auctioneer to conduct their Sales, can have the date of the Sale at the Review Office Bow Island, Alta.

Death of "Bob" Edwards Editor of the "Eye Opener"

Robert Chambers Edwards, editor of the "Calgary Eye Opener" and elected last year to the Alberta Legislature, died on Tuesday night at 10:30 at his home in Calgary, from the after-effects of an attack of influenza, which left him with a form of heart disease. Mr. Edwards was born in Edinburgh on 12th. September 1861

Both his parents died during his infancy, he was educated in a private school at St. Andrews, then at the Edinburgh High School and later at Glasgow University. He was known far and wide for his dramatic exposure of many evils. The funeral will take place today Friday at 2:30 p.m.
